To whom it may concern

I can confirm that Pope Plant have recently undertaken some reservoir embankment repair works for Anglian Water in the Essex area.

The work was undertaken in a professional manner and done so in the most efficient way. Craig Pope was on site ensured the work was being undertaken safely and within the timeframes available to us.

The site was situated in a nature reserve with a lot of interest from the local residents, nature enthusiasts and the Environment Agency, Craig and his team conducted themselves completely appropriately with consideration to all stakeholders involved.

I would completely recommend Pope Plant to anyone needing heavy earthworks undertaken.

Yours faithfully,

Christopher Stenen Miles

Project engineer
