To whom it may concern

Work refernace for Pope Plant ltd

I can confirm that Pope Plant have worked for Biffa waste on various site's that I have managed over the last few years. They have been involved with various jobs including the capping and restoration of Shakespeare Farm Landfill site which involved a complicated series of uncapping landfill, stockpiling the materials and then reinstallation of capping.

One of the most important jobs that Pope undertook was at Brookhurst Wood. The installation of a perimeter leachate collection system and along with 30,000 m2 of Landfill capping. This involved the stripping of existing capping membrane and installation of under cap gas and leachate collection system. The works started in Jan 10 and finished in Feb 11. While onsite POPE adhered to all Biffa health and safety procedures and worked well with other contractors and site staff who were based onsite. Because of the way they have worked on our sites Pope Plant are now on our preferred list of companies when the works go out for tender.

Yours faithfully
for and on behalf of Biffa Waste Services Ltd
