To whom it may concern

POPE PLANT LTD

Red Materials Ltd are currently contracted to complete the Restoration of Runfold South Quarry, a former sand and gravel quarry operated by Suez. The Restoration scheme comprises of capping Area's A & C (c. 60,000sqm) with Geosynthetic Clay Liner and constructing a clay lined cell to facilitate the disposal of Non-Hazardous soils.

We engaged Pope Plant Ltd over a period of 18 months for two phases of work at Runfold. In June 2017 Pope Plant installed (c. 28,000sqm) of GCL cap in Area A with the remainder planned for April 2018.

More recently Pope Plant have completed the engineering of the clay basal liner and leachate infrastructure in Area C. There have been various design changes mid project to which Craig Pope has adapted admirably, completing the project on schedule.

All work has been carried out in accordance with an approved CQA Plan and has been undertaken to the highest standards.

Craig Pope and his team are knowledgeable, approachable and have an excellent attitude towards Health & Safety

I would strongly recommend the services of Pope Plant Ltd.

Yours faithfully

David Reader

Operations Director
