To whom it may concern

Ref: Pope Plant Ltd

Pope Plant Ltd have carried out two very successful and sizeable projects for us involving the movement and placing of over 100,000m<sup>3</sup>. The first being a large muck shift at our Mercers Quarry and the second being cell preparation at Glebe Lake.

Both projects were completed ahead of schedule and at an excellent quality. The Pope Plant team headed by Craig and all the machine operators were a very professional outfit. At no time did we have any operational issues and we worked very closely with them in achieving two excellently executed projects.

I would have no hesitation in recommending them to others nor in appointing them for future works with my company.

George Crate  
Landfill Manager
